

Hurricane Ike made landfall about 330 AM EDT with max winds 110 mph on Galveston. Estimated storm surge ranged from 15-25 feet in Galveston Bay with 9-18 feet on the central and western LA coast.

Ike will produce 5-10 inches of rain in eastern TX today, and Eastern TX will experience Hurricane force winds until about 300 pm EDT today and as far north as Nacogdoches and possibly Longview, TX.

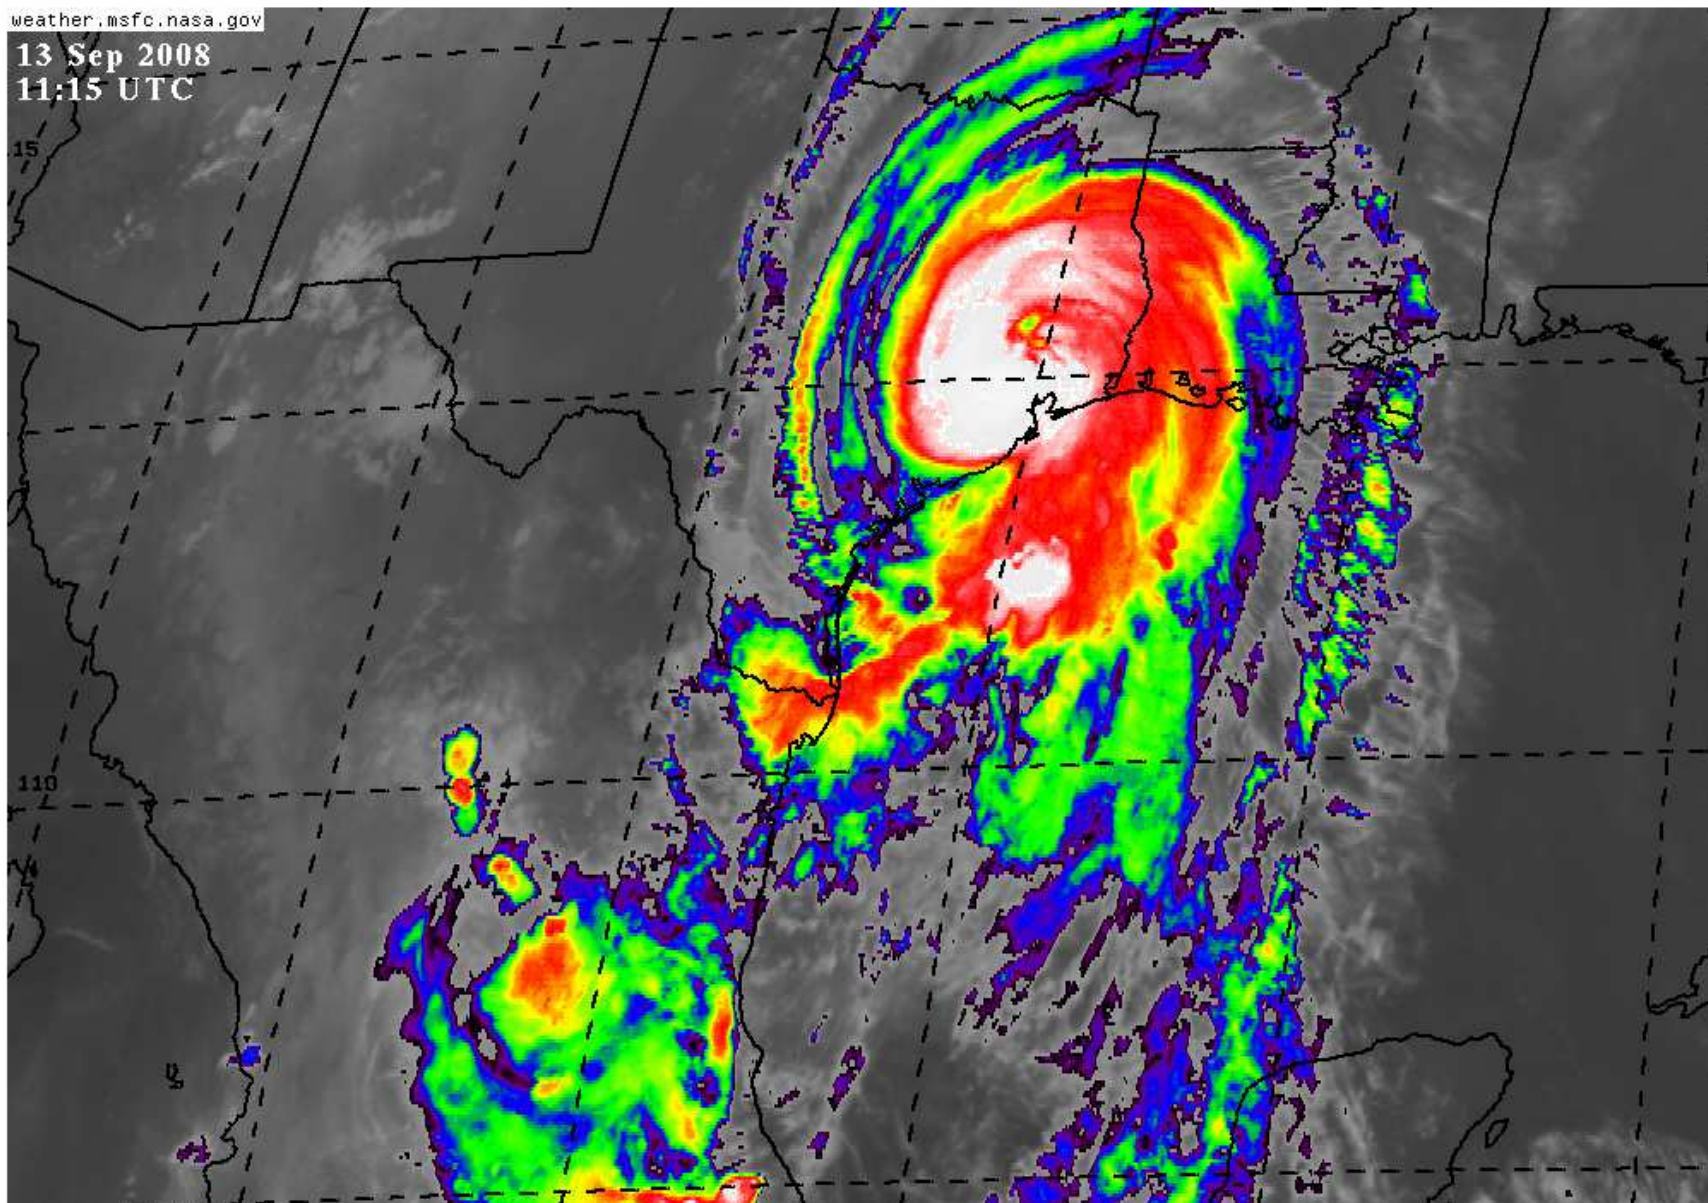

TS winds will continue as far north as Fort Smith and Russellville, AR, before diminishing around midnight tonight.
